Then the problem is going from 2nd gear. Roars until you lift your foot from the gas. Check your tranny fluid level too and refill it if its low. If your manual transmission vehicle is slipping gears, it could be a sign of a clutch-related issue, possibly due to worn out friction material and/or a pressure plate defect. However, it's also possible that the problem could stem from the motor itself.

The engine sounds fine, but whenever I shift through the gears, there is a stutter. My 2.3l likes to shudder.

You may find that you can't get the transmission out of gear. This symptom may indicate: Low oil level or the wrong type of oil, transmission problems. We also cover the Ford Ranger, Explorer Sport Trac, Mercury Mountaineer, Lincoln Aviator, Mazda Navajo, but only if my rpms are too low for that gear. My 2.3l likes to shudder.
